Sudden Death of James Smith.
The announcement of the death of
Mr. Smith, Saturday evening, came as a
shock and surprise to the citizens of
our village. He had had several periods
of illness during the year, one very
severe one a few weeks before.
He had been seemingly as well as
usual through Saturday. After tea he
had gone to business, making brief calls
at the Elm and Ginn houses and shortly
after half past six coming to the store
and not feeling just right had returned
home. Immediately on his arriving at
his house he was taken violently ill, a
physician was summoned but efforts to
save his life were unavailing.
James Smith was a native of Norway,
a son of James Smith and Eleanor Ray,
and was born July 29, 1837. Outside of
a few years he worked as a
machinist in Massachusetts, he resided
in Norway engaging in the shoe busi-
ness, first at Norway Lake and more
recently in this village.
He married first Lizzie C. Walker of
Fryeburg, and his second wife, who sur-
vives him, was Mrs. Sarah Seavey of
Norway. He leaves three children:
James Orrin, attorney at law in Presque
Isle, Charles R., a photographer of Port-
land, and Edith M., who resides at
home.
He was an attendant upon the services
of the Universalist church, a Democrat,
but taking comparatively little interest
in politics in recent years, and a member
of Oxford Lodge, F. & A. M.
Funeral services were conducted at
his late residence on Deering street,
Tuesday afternoon, Rev. C. E. Angell
and Rev. B. F. Fickett officiating. There
were many beautiful floral offerings.
Oxford Masonic lodge attended and con-
ducted their ritual service at the home
and at the grave in Pine Grove cemetery.
The stores in the village were closed
from 2 to 3.30.

Work of the Veranda Club.
The Veranda club held the annual
meeting Thursday with Mrs. Cora Cor-
well. Officers were chosen: President,
Mrs. Cora A. Cordwell; Vice-president,
Mrs. Frank Munkord; Treasurer, Mrs.
Vera Kilgore; Secretary, Mrs. Emma J.
Wichman. With this meeting is resu-
med the regular work of the club which
has been discontinued to a large extent
through the summer.
The club has had several very pleasant
gatherings through the summer, an es-
pecially enjoyable one being held with
Mrs. Ida Holt in Oxford. A number of
the members and friends are organized to
provide an out door dinner which was most
excellent and received ample justice
from the party which gathered. It set
the standard very high and will not
easily be surpassed.

Prescalle.
This gifted artist appears at the Nor-
way Opera House all of next week, Oct.
19th to 24th. The Waterloo, P. Q., Ad-
vertiser under date of Oct. 5th says:
"The peculiar weird performance given
by Dr. Prescalle at the Opera House last
past week was witnessed by a large and
appreciative audience each evening.
They certainly left the hall with a much
higher sense of psychic power than when
they went there.
Prescalle is a highly refined and sen-
sitive gentleman, who has the moral cour-
age to carry them out. His method of
dealing with his witnesses and the
"field" called magnetism is quite unlike
most operators in this occult field. Pre-
scalle makes a strong plea for the rational
investigation of the phenomena for its
usefulness in curing many diseases.
Don't fail to see him Monday night, Oct.
19th.
Quite an excitement was caused in the
place by a Buckfield boy losing a watch
on the playground at the Grange. An
East Hebron boy has been accused. The
lawyer and jury were not called and
"field" called magnetism is quite unlike
most operators in this occult field. Pre-
scalle makes a strong plea for the rational
investigation of the phenomena for its
usefulness in curing many diseases.
Don't fail to see him Monday night, Oct.
19th.

bert Quartette, Mrs. Wilson, Miss Wheel-
er, Mrs. Smiley and Mrs. Burnham, will

young people's orchestra has been en-
gaged for the occasion.
One of the attractions of the evening
which cannot fail to please will be the
laughable comedy—Our Aunt Robertina
—with the following cast:
Mr. Aspen, an English count. J. H. Bean
Gandy, his daughter. O. H. Stuart

Universalist Church.
Work on the interior of the Universa-
list church in this place is progressing
finely but slowly owing to a scarcity of
carpenters. R. N. Hall is putting on the
white wood finish around the windows

floors is all in the building.
One of the memorial windows has
been placed in position and is a very
handsome window. The other one
which will fill the whole frame on the
Pine street front will soon be in po-
sition. It took 41 pieces of casing for this
window.

NORWAY AND VIGOR

Saw Other People's Money

There was but a small attendance Friday evening at the performance of Other People's Money by a company headed by James R. Waite. The play was advertised to be pure fun and it was one of the most amusing comedies ever put on the Opera House stage. Through some misunderstanding there was no piano player which made the waiting before the play and between the acts a trifle wearisome but there was no lack of interest in the performance.

Mr. Waite was Harrison Hopper, a self-made, wealthy broker with an exalted idea of his skill in financial and flirtation affairs giving his advice to his young clerk in the matter of winning the daughter of a wealthy man and eloping with her, only to find the young man had taken his own daughter by his own unconscious advice and aid.

Mr. Waite was excellent, and the several actors supporting him, seven in number, were also good some of them being truly stars.

Mrs. Frank White of Danville Junction spent Sunday with Mrs. Jennie Young.

Mrs. Amy E. Marshall is canvassing for books suitable for Christmas presents.

Osgood Drew of North Fryeburg has been spending a week or more in Norway.

Saturday morning, Hazel Bicknell showed us a branch she picked bearing ripe raspberries. Saturday afternoon, Mrs. Carrie A. Briggs of South Paris brought in a spray of several ripened berries.

John W. Carter, foreman of the lasting room at the Skovog shoe factory, visited his father, Leonard Carter, last week. He did some hunting but failed to get any big game. He found some full grown ripe strawberries in his travels which he presented to us as a curiosity. Strawberries in October is a good way out of season.

Rena York of Rockland, who has been spending a week with her aunt, Lilla York, brought to Norway, Friday, her first deer which she shot Wednesday evening just after the moon had risen, in an orchard near the camp. It was a doe and weighed about 200 pounds. The next day Lilla York shot a buck weighing about 175 pounds near the same place. They also heard bears and were chased by one Wednesday night while bringing the deer to camp.

Letter to Freeland Howe.

NORWAY, ME.

Dear Sir: The trustees of Fair Ground, Cobleskill, N. Y., were glad to pay 15 cents a gallon more for Devos, and no wonder. Two other paint agents said it would take 150 gallons of their paint to cover the buildings.

Our agent put it at 125 or less. It took 115.

We saved them 35 gallons of paint and painting (worth \$4 to \$5 a gallon, as the painting costs two or three times as much as the paint) less 15 cents a gallon on 115 gallons. Say \$140.

That's how to count the cost of paint. The cost of putting it on is \$3 or \$4 a gallon. You see what that means. Go by Devos.

Yours truly,
F. W. DEVOS & Co.,
New York.

P. S. F. P. Stone sells our paint.

Of the three fresh water fish recently discovered in Maine and named after the State fish, game commissioners by the U. S. fish commission, one, named for Hon. Henry O. Stanley, is called the coregonus stanleyi, and is found in the chain of Eagle lakes. It is thought to be a conspicuous item in the menu of salmon toque and trout. It is very seldom seen except in the breeding season. It is said to be an excellent pan fish.

Hon. H. O. Stanley, whose home is in Dixfield, has been for 32 years on the inland fish and game commission.

To Mine Gold in Byron.

A company is being formed by the Maine gold enthusiasts to mine on the Swift river—in fact they intend before many months have passed to have a crew of men at work on the very spot where gold was discovered in '89, and which was worked for four years by the Whitneys.

Perley A. Whitney of Auburn when interviewed about the matter said, "Yes I know there is gold there, and feel sure that there is \$2 per day to a man for a hundred miners for a hundred years." To his knowledge \$8,000 at least was taken out by different parties in the first year after the discovery of gold.

"I haven't a doubt but what this region if opened up would rival Cripple Creek, but the residents won't work the mines themselves and won't let anyone else, but I have prospected clear through to Rangeley and found gold everywhere, even on the tops of the mountains, at the mouth of the Swift river, along by Rumford Falls and Mexico, fine gold is found in the sand, not enough to pay for working it, but it is conclusive proof that the Swift river flows through a gold region. This gold strip is seven or eight miles long and about three miles wide, and the gold which occurred in pockets is found loose in the crevices of the ledge along the river and in the bedrock. It is easy enough to build temporary dams and work on the river bed. Most of the mining in this region has been done in crevices running along the edges of the river and in the channel which is full of gold, but this new company will probably work back into the ledges."

Mr. Whitney himself is an experienced miner, having mined in Nevada in his younger days, and his father is an old California miner.

Gold was first discovered in Maine at Gum Corner in Byron by an old miner by the name of Norcross, who was fishing on the Swift river. Mr. Whitney and his father, who were fox hunting in this vicinity, became interested, looked the ground over and then pitched their tent on the ice and went to work. At the end of six weeks prospecting they found thirty-seven cents worth of gold, and this so encouraged them that they set to work with redoubled energy. They went farther down the river and in one painful obtained twenty-five cents worth of gold, and at the end of the day they had screened out one dollar's worth. This was strikingly rich, so they moved their tent, and satisfying themselves that this was one of the best spots along the river, they began negotiations at once, and purchased the G. L. Hall place for \$1,200. This property extended across the river in such a way that it gave one hundred rods or more of river frontage.

They moved their goods from Upton and worked for gold for four years, during which time they took out about \$4,000 worth. Some of the people round about thought they were mining nothing but brass, so the Whitneys sent two lots of gold to Philadelphia and had it made into money, and this gold coin quieted all fear as to the quality of the ore mined.

Mr. Whitney then described the different processes of mining.

When prospecting the miner takes his pick and pan and goes to work. When the pan is filled he takes it to the water and shakes it constantly as he washes the dirt out, and the gold if he has been fortunate enough to get any, will be found at the bottom of the pan.

Another primitive method of screening is with the rocker. This rocker is composed of a large box about four feet high on rockers. The dirt is put into the hopper at the top and then the water is turned on and the fine dirt is washed away, while the gravel is left with the gold at the bottom. This method is the one used by the Whitneys, but the new company intend to get the gold by sluicing. The sluices are made by fitting together "boxes" which are composed of a bottom and two sides. This sluice is placed so as to get a two-inch head of water and then the dirt is shoveled in and the gold is caught in the riffle which is placed in the second or third box from the top. They may possibly do some hydraulic mining, too, as sufficient pressure is furnished by the Swift river at this place for in a hundred rods there is probably a fall of thirty feet, thus making the water very rapid.

Chicago to the Sea.

By the end of the fiscal year 1904, the Grand Trunk will be operating a double track line from Chicago to tide water, which will be the shortest line, the lowest grade and in every way the best qualified road for the shipment of Western products to European ports during the season of open navigation on the St. Lawrence.

This line has been rebuilt and now the competition of the Grand Trunk as a freight line, long talked about in trunk line circles, has within the past year become a grim reality. Grand Trunk has carried to the sea more than five times as many tons of grain as any one of the American Trunk lines, and has wrested from Lake Shore the honor and profit of being the leading carrier of packing house products for export. The advantage of Grand Trunk will be pushed as far as it will carry the road. Physically, the fact that Grand Trunk operates a line from Lake Michigan to Montreal through country that has not a single hill over 500 feet in height is doubtless the underlying cause of its supremacy.

A writer who poses as an authority on pie contributes to the columns of an exchange an article on the subject in which occurs the following sentence: "There's a soggy crust on the custard pie." Now even the youngest amateur in the business knows that custard pies never have crusts on them. Moreover a soggy crust is a contradiction in terms, for a crust in order to be true to its name, cannot be "soggy." Why will writers continue to write about things of which they know nothing. The subject of pie is one too sacred and deep and broad and far-reaching to be safely trusted in the hands of the inexperienced. The writer here alluded to is simply an individual example of a class. Most of them have crust enough, but where they have none they assume it.

Wedding.

Married at the Congregational church on the evening of the 6th, by Rev. E. W. Pond, Isaac Sheldon Leadbetter of Lynn, and Lillian G. Bicknell, eldest daughter of Mr. and Mrs. Maurice Bicknell.

The church was nearly filled with guests invited to the ceremony. The bride was dressed in an elegant white silk dress and looked lovely as brides are expected to. The maid of honor and bridesmaids were dressed in white and made a fine appearance.

The groom, dressed in the customary black suit, bore his part nobly and to the satisfaction of all present. Mr. Leadbetter's friend and best man performed the duties required on such occasions.

A reception was held the remainder of the evening during which the congratulatory of friends were extended to the newly wedded.

The presents were varied, ornamental and useful and consisted of silverware and table linen principally. A delicious treat was furnished and enjoyed by all who partook. A couple hours were passed in a social and friendly manner. Our best wishes follow Mr. and Mrs. Leadbetter on their journey through life.

WEST PARIS.

A Home Wedding.

A quiet but pleasant home wedding occurred at noon on Wednesday, Oct. 7, when Mina Berdena, only daughter of Mr. and Mrs. George W. Bryant, was united in marriage to George Dana Robertson of South Paris.

The ceremony was performed in an impressive manner by Rev. D. F. Nelson of the Methodist church, the Episcopal service with the ring being used.

The bride wore a gown of dainty white muslin, which was trimmed with a quantity of fine tucks and a wide lace insertion. Cream white bride robes were also worn upon her dress and in her hair.

The room was tastefully decorated with evergreen and potted plants and bouquets of beautiful roses and pinks. The couple stood beneath an arch of lace drapery, entwined with evergreen and looped with sprays of roses and pinks, made in one corner of the room between two windows. In the center at the top hung a lovely horseshoe of pink roses and white asters. This was given by a friend for "good luck."

Only the immediate family and five or six invited friends were present. After the ceremony an appetizing lunch was served and the happy couple then started for a several days carriage drive to the White Mountains, returning Monday night of this week.

Mrs. Robertson is one of our highly esteemed young ladies, and the groom is a well known and much respected citizen of South Paris. Their many friends unite in wishing them happiness and prosperity. Many pretty and useful gifts were received by the couple. They will make their home with her parents the coming winter. Next spring they intend to begin housekeeping in his home at South Paris.
